General Information

Information and Science Technology in Asia Pacific (APIC-IST 2009) has been dramatically developed and applied significantly to the areas of CT, BT, ET, ST, and NT with well defined industrialization policy. In this time, the conference will be held in particular to celebrate inclusion of our society's journal, TIIS, in SCIE index. Standardized technologies will unify social behaviors based on their own culture and share resources and technologies with other nations.
